Carbon Reduction

Plan 2024

eastwest
medico

INTRODUCTION

At Eastwest Medico, we are committed to addressing climate change and reducing our greenhouse gas (GHG) emissions. This nine-step Carbon Reduction Plan outlines our strategic approach and targets for mitigating our carbon footprint across our operations and value chain. By setting clear goals, implementing mitigation measures, and tracking our progress, we aim to contribute to a sustainable future and demonstrate our commitment to responsible business practices. Together, we can make a significant impact in reducing emissions and fostering a greener future.

1. MEASURE AND MONITOR CARBON EMISSIONS

Eastwest Medico will conduct a carbon footprint analysis to identify the sources and amounts of greenhouse gas emissions associated with its business operations. This will help identify areas of improvement and set reduction targets.

2. REDUCE ENERGY CONSUMPTION

The company will implement energy efficiency measures to reduce energy consumption. This may include upgrading to more energy-efficient equipment and appliances, improving insulation, and installing renewable energy systems like solar panels.

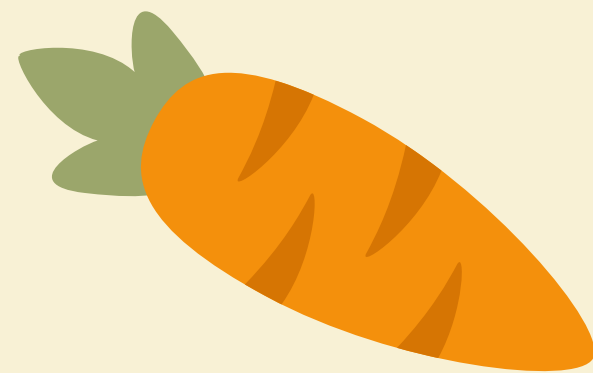

DRIVING ENERGY EFFICIENCY

BUILDING A SUSTAINABLE SUPPLY CHAIN

medico

3. REDUCE TRANSPORTATION EMISSIONS:

The company will explore ways to reduce emissions associated with transporting goods, such as using more efficient transportation methods and routing, consolidating shipments, and promoting sustainable transportation options for employees.

4. IMPROVE SUPPLY CHAIN SUSTAINABILITY:

Eastwest Medico will work with Top Glove and other suppliers to improve their sustainability practices and reduce the carbon footprint of the products and services they provide. This may include requiring suppliers to measure and report their carbon emissions, using more sustainable materials, and reducing waste.

PROMOTING GREEN PRODUCTS, FCS PACKAGING AND MONITORING

5. PROMOTE SUSTAINABLE PRODUCTS:

The company will continue to promote its biodegradable gloves, which have a lower carbon footprint than traditional nitrile gloves. It will also explore ways to reduce the environmental impact of other products and services it offers.

6. FCS PACKAGING:

Eastwest Medico will transition towards only using FSC certified packaging.

7. MEASURE PROGRESS:

Eastwest Medico will track its progress in reducing carbon emissions and regularly report on its performance to stakeholders.

8. EMPLOYEE ENGAGEMENT

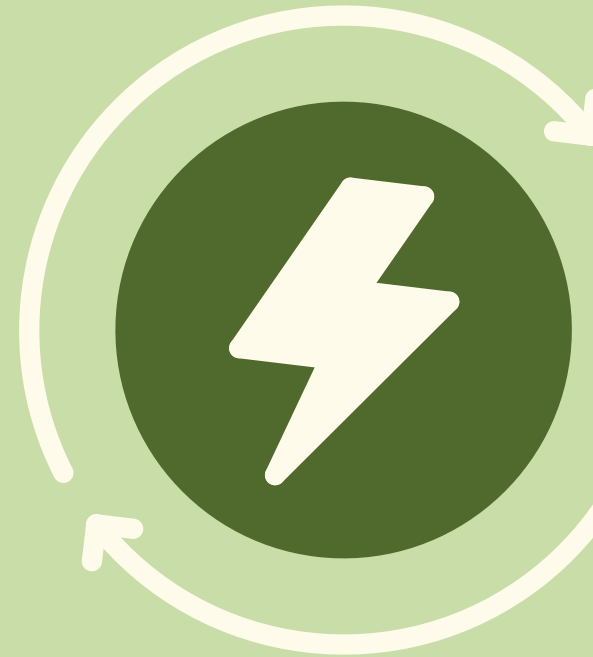

The company will engage employees in its carbon reduction efforts through education and awareness programs, and by encouraging them to suggest and implement ideas for reducing carbon emissions.

EMPOWERING EMPLOYEES FOR CLIMATE ACTION

Net Zero

9. The company will publicly commit to achieving net-zero emissions by 2050, in line with the Paris Agreement on climate change.
